KEY PROJECTS

Safarnama – Travel Platform for Underrated & Hidden Destinations | *MERN Stack* Award-Winning Team Project GitHub

- Worked on both the frontend and backend using React, Node.js/Express and MongoDB, with JWT authentication; the core feature lets users discover and read about lesser-known destinations across India.
- Also includes travel blogs, a photo/video community feed with likes and comments, and real-time chat using Socket.io.
- Won the Special Jury Award for Most Innovative Project (INR 10,000) at a university competition.

DevBlog – Developer Blogging Platform | *MERN Stack* Internship Project, EDXcellence GitHub

- Built with React, Node.js/Express and MongoDB: JWT authentication, bcrypt password hashing, email verification, a Quill rich-text editor with image uploads, full-text search, tag filtering and pagination.
- Added likes, bookmarks, nested comment threads, a follow system and an admin moderation dashboard; secured the API with input sanitisation, Helmet and rate limiting.
